

Educate • Advocate • End Abuse

LUNCH & LEARNS

Is your healthcare setting prepared to help patients who disclose Domestic Violence or Sexual Assault? Are you aware of the connection between violence and a patient's health? Healthcare providers are an essential link in the coordinated effort to break the cycle of violence and build a healthy community. Identifying and responding to Domestic Violence and Sexual Assault in health care settings can make a tremendous difference for patients' physical health, mental health, safety, and quality of life.

Safe Berks' Medical Advocacy Partnership Program (MAPP) is offering assistance and education to all healthcare providers of Berks County via *Lunch and Learns*. We will provide the lunch and the education about domestic violence and sexual assault. All you need to provide is the space and interested employees.

If you are interested in setting up a Lunch and Learn, please contact Meghan Sager at MeghanS@SafeBerks.org or call 610-370-7606.

Safe Berks is offering free lunch and education to Berks County Healthcare Facilities.
